Projects

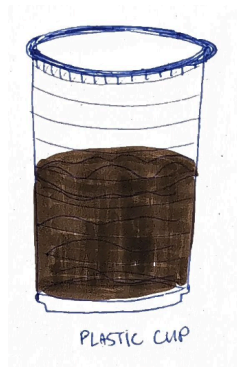

Students have created a one-page, short pitch on their dedicated page below. See the [brief](#) for more details. This pitch will be demoed and discussed with Cassandre & Muriel on [2025-05-19](#).

thé / café

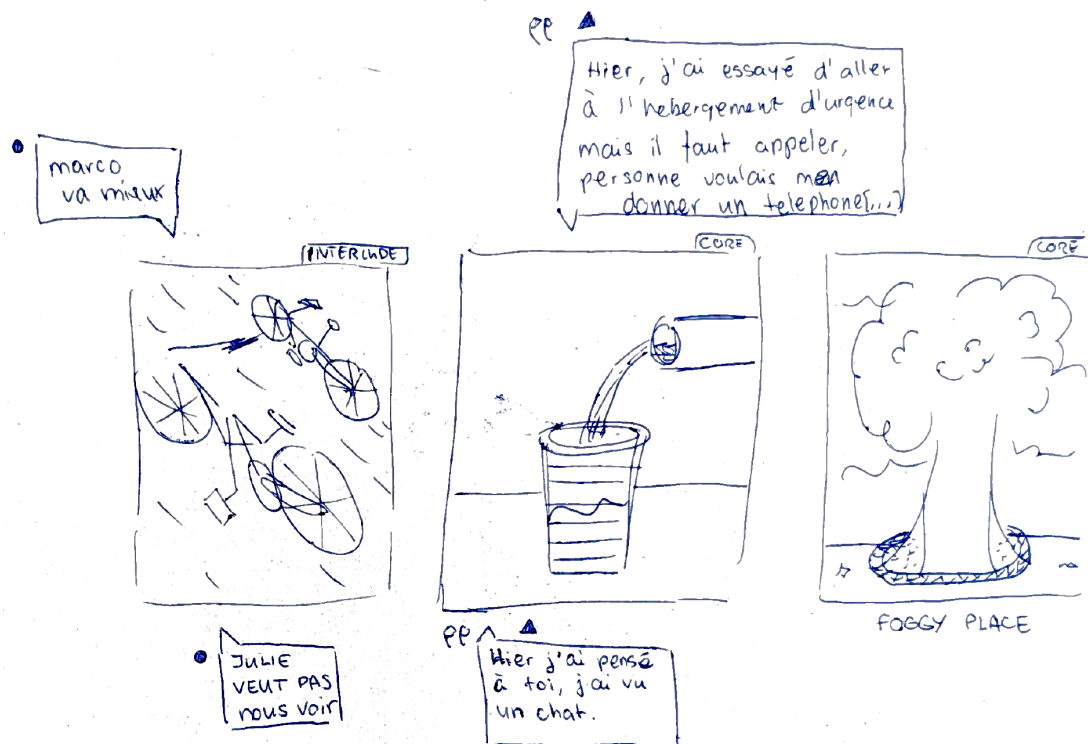

Vincent Paley, Antony Neyret, Elena Gazzarrini

Context

The Street

Two people on their bicycles pedal through the grey streets; through the fog, they see Marco sitting on a bench under a big tree, next to his stack of luggages. As they approach and offer him a tea or a coffee, the fog lifts up and reveals details about the surrounding environment. The cup empties as the conversation unfolds. We follow them as they repeat the simple act of offering tea or coffee to people inhabiting the streets of Geneva as the night evolves.

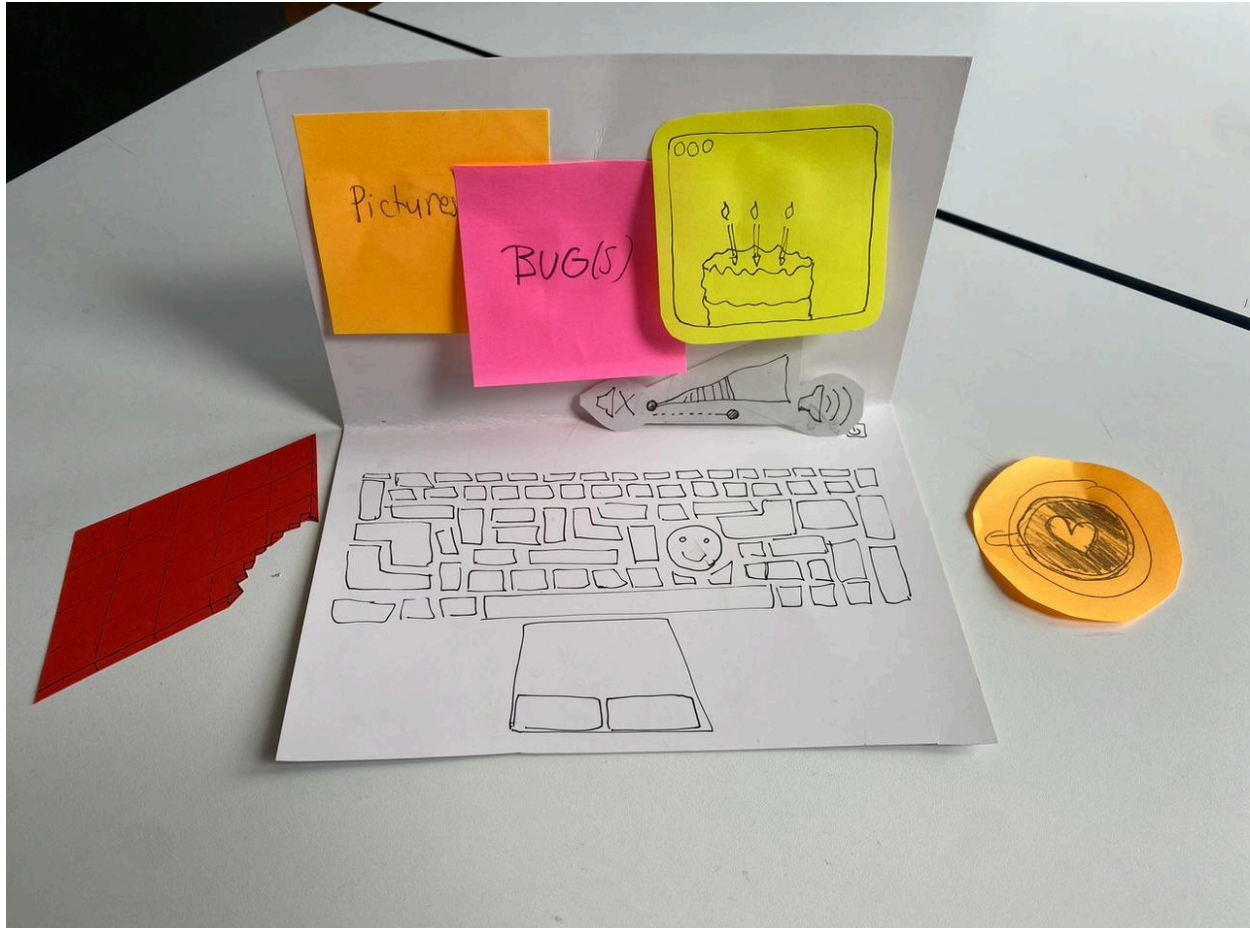

As Time Goes By

Ariadne MELISSARGOS, Alireza ASNAVANDI, Julia SANGNAKKARA

Context

Maison de l'Adret

In an intergenerational cohabitation building, a student named Ibrahim helps a senior resident, Anna, with some computer issues. Ibrahim gradually discovers that one of Anna's close friends chose to end her life through assisted suicide provided by an association called EXIT.

For the rest of the story, we are thinking about two dilemmas. One is about Ibrahim, as he decides whether to ask Anna more questions about her deceased friend or not. It may deepen their relationship, or it may make Anna feel insecure. Another idea, which is related to the first one, is Ibrahim choosing whether to keep the memory of Anna's friend, as an image on her computer, or not. This raises the question of whether keeping a dead person's memory alive or not.

Questions

- Can we use sound to tell our story ? What are the limitations ?

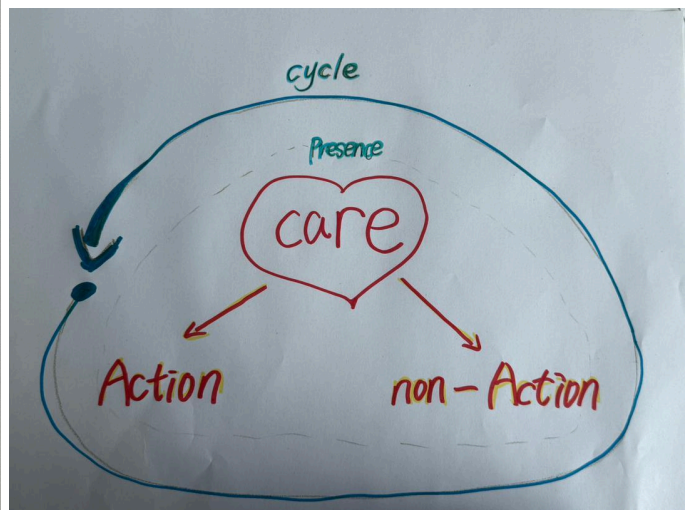

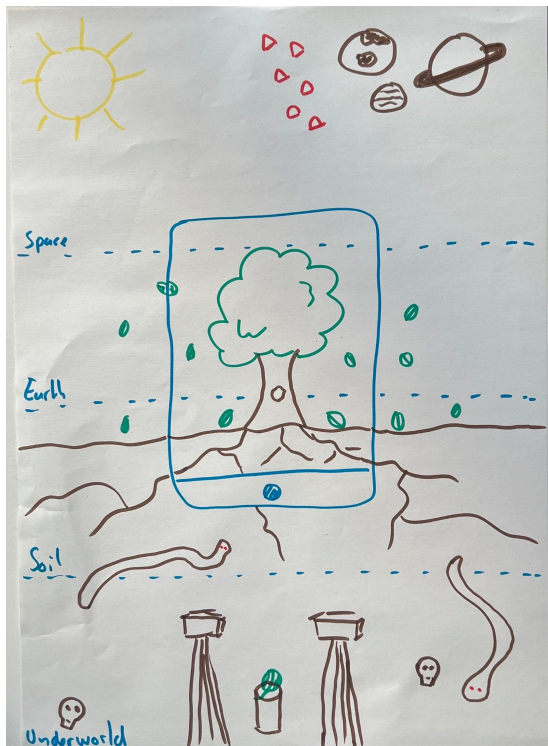

Let it lie

Eryan Chen, Nicolas GROSFORT

Context

Cemetery

Hans, a gardener in a cemetery, performs his daily tending tasks until one day, following a red string, he digs a hole and discovers a passage to an underground world. From spring to winter, he travels through four layers - underworld, roots, surface, sky - encountering the living and non-living that inhabit each. At every step, he faces the same dilemma : does this moment ask for his action, or simply for his presence?

Questions

- What is important for you in the representation of a cemetery? - Geneva
- Who is speaking? Which point of view? - No matter
- What place is there for magical things as a metaphor to talk about life and death? - Open

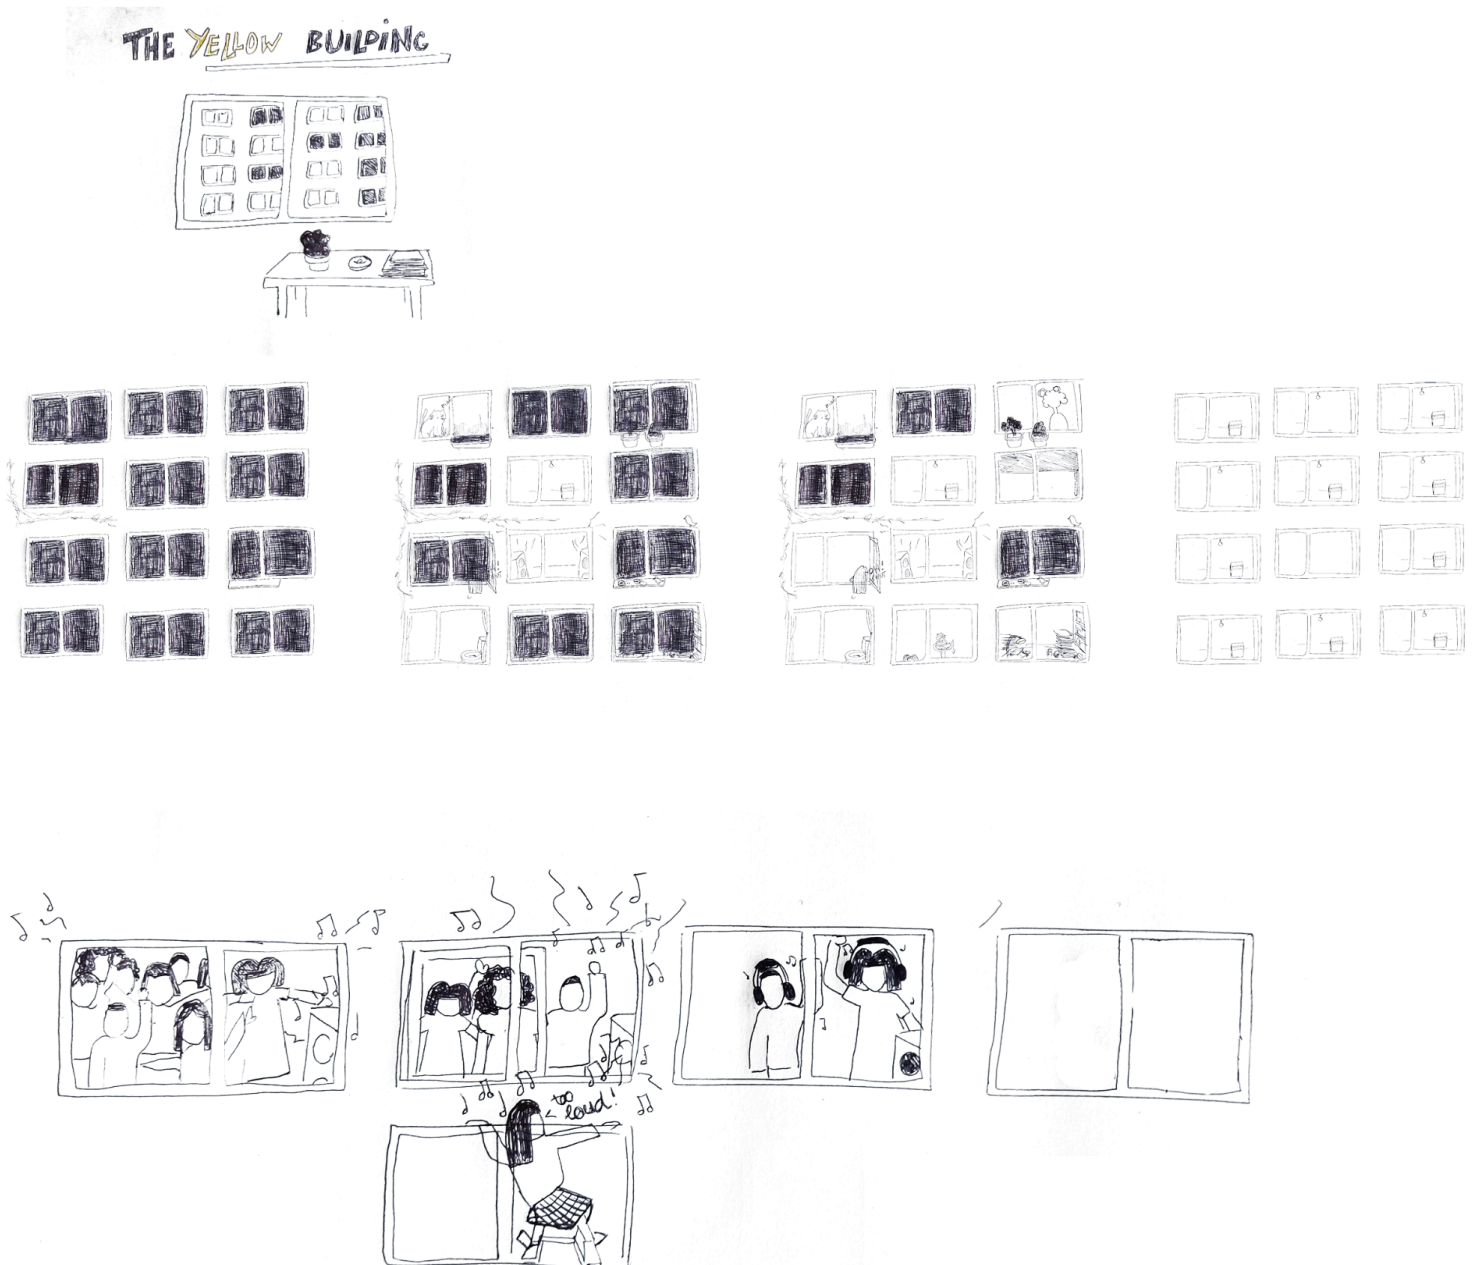

The Yellow Building

Gold KIM, Zhanlan WANG, Lisa GIRAUD

Context

Les Augustins-L'immeuble Place des Augustins

Through my window, I see the yellow building. Every light shining through a window is a whole life. One by one, the lights are gradually going out. I see people on the other side. The sounds of people talking and laughing through the windows give the building warmth and life. Only a few lights remain. I try to capture the moments of these residents to preserve them. Just one last flash of light. The building goes dark, and those memories go with it.

Kykyky !

Zainab OURIACHI, Maria SARAFI, Rokhy NIANG

Context

Cohabitation

[Kykyky Animation](#)

Seen through baby Rokhy's eyes, the story follows the first three years of her life in a cohabitation apartment with Lucky, an English bulldog, and Cheeky, a Maine Coon cat.

Rokhy and Lucky are born on the same day in neighboring apartments and quickly become inseparable. Lucky rocks her in the living room, sleeps beside her, and watches over her. Life is peaceful until Cheeky, a grumpy cat, moves in on her robot-cleaner "throne." She constantly bumps into Lucky and Rokhy, eats Lucky's food, and completely ignores Rokhy's complaints. The tension between the three cohabitants slowly rises.

But when Lucky falls ill, Cheeky begins to soften. Together, Rokhy, Lucky, and Cheeky become the KyKyKy team and learn that living together means caring for one another.

Baked Fragments

Kostas KATKEVICIUS, Carla Noëlle MARTINI, Luca CORREIA DA ROCHA

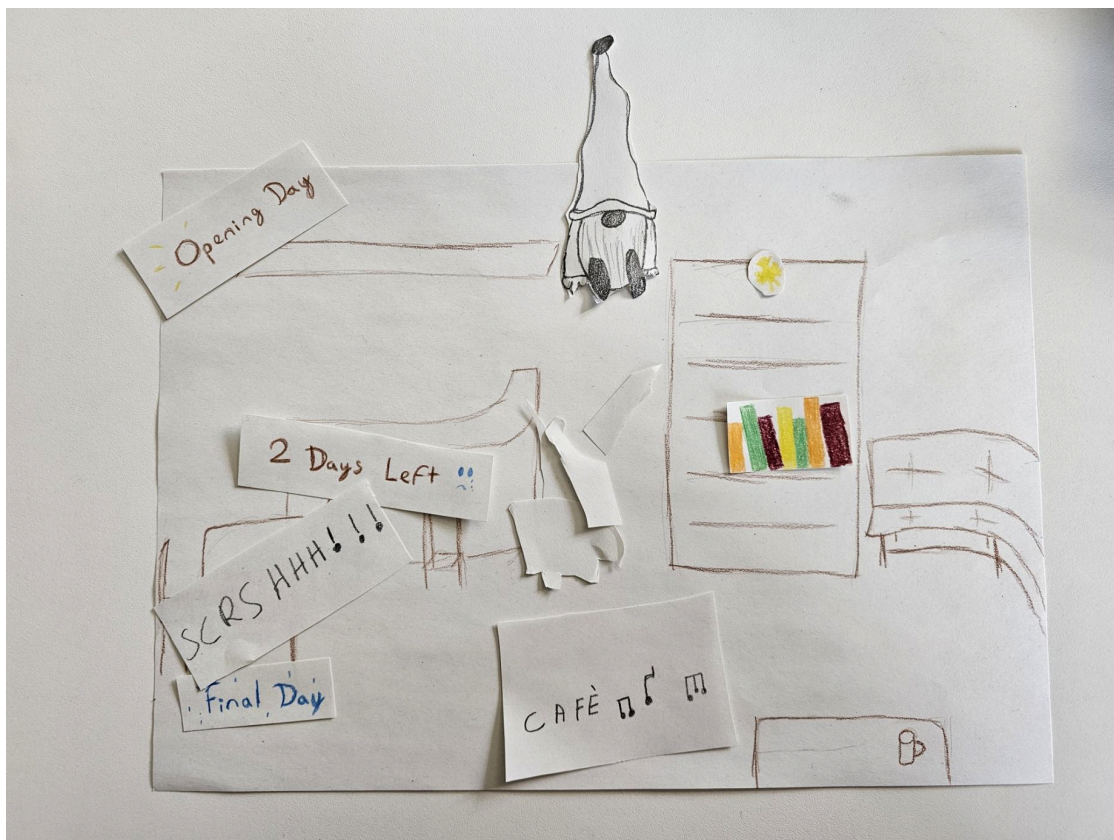

Context

Tea Room

Intention

Over the years, Monika's café has become a whole world filled with gifts, but the sad time has now arrived for the shop to close. When the very first object ever given to the café shatters, a new customer named Tom starts putting the pieces back together. As the pieces come back together, the café's beautiful history unfolds, but it also brings us progressively closer to the café's end.

Cardboard / Paper prototype :

Care

Storytelling Workshop

Master Media Design, [HEAD – Genève](#) + [Bibliothèques de Genève](#)

Shortened URL

<https://bit.ly/head-md-care>

TL;DR

We are creating tablet-based stories for an in-situ exhibition on the concept of “Care” at the Geneva Municipal Library. Our goal is to collect stories for the exhibition, and transform them into interactive stories.

Dates

- Workshop: April 27 to June 17, 2026
 - 32 full day sessions: See [Planning](#)
 - Test day: May 15, 2026
 - Final presentation: June 16, 2026
 - Documentation: June 17, 2026
- Exhibition: October 2026

Brief

Exhibition

The goal of this workshop is to develop a tablet-based interactive story for the exhibition **Bonjour, ça va ? Petites histoires pour créer du lien*** at the [Geneva Municipal Library](#) in October 2026.

Each Media Design team will present to the curator of the exhibition:

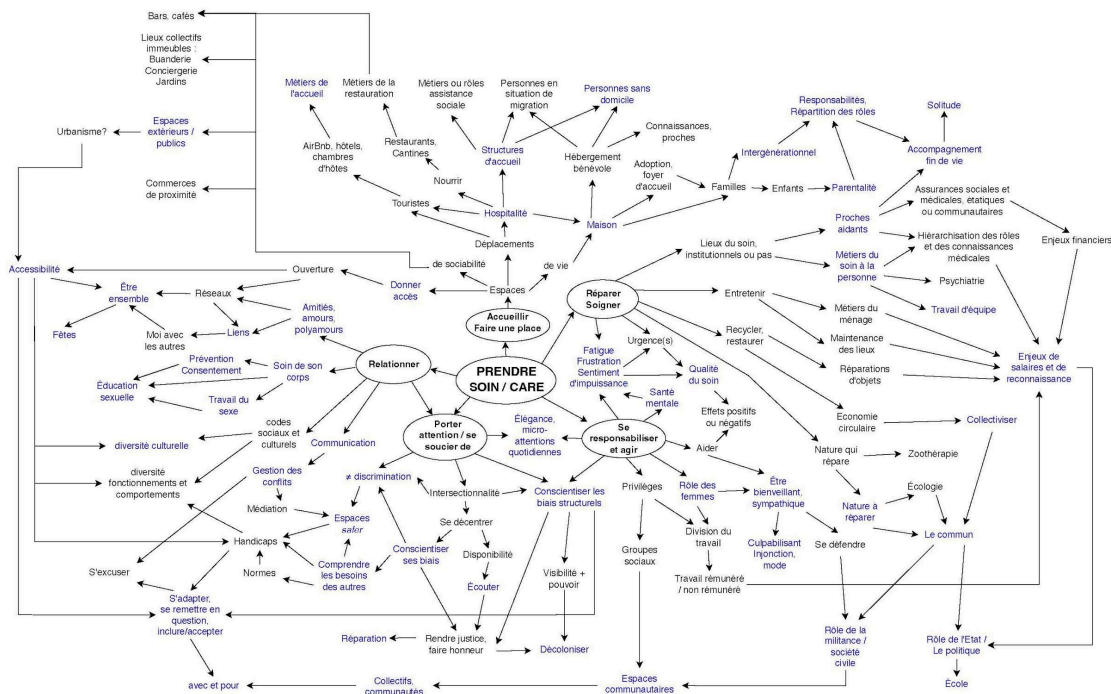

- a general concept in mid-May
- a final working prototype in mid-June

Depending on budgetary constraints and realistic production timelines, one or two of these prototypes will then be converted into a fully-produced iPad application.

***Hello, how are you? Short stories about building connections**

Concept of Care

The original working title for the exhibition was « care », a popular word in the anglo-saxon theoretical world; this anglo-saxon definition of *care* will be our north star throughout this workshop.

The [concept of care](#) is multiple — taking care, caring for, caring about, ... — but ultimately can be resolved down to the question of how to live amongst and for others, with intention. The term [emerged in the 1980s](#) from [feminist theorists](#) unsatisfied with [traditional definitions of ethical behavior](#) and their conceptions of the relationship of self and other.

Your goal will be to go out into the field, discover and record a community, a group, a non-profit, a person practicing a form of care, and translate these people's stories into a poetic interactive representation.

Interactive Stories

Your final goal is to produce an interactive story representing one of the seven [contexts](#) pre-selected by the curatorial team, [listed below](#). This list is large and covers many aspects of living together, caring for others, and creating inclusive alliances and community. All seven of the contexts take place in Geneva.

This story can be told through interactive dialogues, spatial storytelling, even gameplay mechanics: visual puzzles, walking simulators, choose-your-own-adventures, non-linear interviews, interactive documentaries, collection games, customization games, farming/garden simulators, et cætera.

Less Is More

However you choose to tell these stories, there must be a simple, core poetic resonance between the mechanics of the interaction and the story of your chosen context. A narratology class will be given near the beginning of the workshop to help you focus your stories to this core poetic proposition.

Story Shape

This brief does not impose any one specific shape or form for your interactive story. One of your goals is, precisely, to find your own unique poetic angle that will tell — using simple and elegant means — the story of a community / context / group.

That said, perhaps as a guiding light to help you understand what we mean by poetic experience, take a look at the powerful non-linear visual novel [Building Stories](#) by Chris Ware, [2012](#).

Narrative as Agency

« We are autonomous when we feel ... the power to gather our own life into an intelligible and acceptable narrative; to be able to tell a story, to reclaim a narrative. We are autonomous when we are able to tell our own story, as the agent of a story — our own.

\

On est autonome quand on ressent ... le pouvoir de rassembler sa propre vie dans un récit intelligible et acceptable ; être capable de faire récit, se réapproprier un récit. On est autonome quand on est capable de se raconter comme agent d'une histoire — la sienne. »

- Cynthia Fleury, [Éthique du care](#), cf. 12:00 (YouTube)

Collection

One of the goals of this workshop is to learn how to *collect* stories from a community, specifically: how to listen, observe, and collect the stories of others. During this collection phase, you will use whichever of the multiple means you wish: notes, drawings, sound and visual recordings, motion capture, body-scans, site-specific scans, 3D modelling, etc. There are many ways to capture the stories of others.

Take your time, with people, with yourselves. Go back, make a second, third, fourth appointment. Re-record. Show your drawings, show your 3D, show your cardboard prototypes, play with your subjects, get feedback from your contacts.

Once you have found a respectful and collaborative means to collect stories, you will translate these stories into your own poetic interactive representation.

Inclusive Design

Many of the contexts identified by the curatorial team imply a politics of inclusion. Many of the core concepts and tips related to *inclusive design*, transfer to telling stories of inclusivity. The strongest introduction to date is Kat Holmes work for [Mismatch: How Inclusion Shapes Design](#). We will use several insights from this book to guide us in our process.

Oneself As Another

While all seven contexts are collective in nature, you might end up choosing to tell the story of one specific individual. If this turns out to be your story approach, this individual should nevertheless act as a portal into their larger social web.

Integrating Skills

In this workshop you will learn to integrate the many methods and technologies you have already explored throughout this first year of the Masters programme, including the technologies you have recently been learning in 3D modelling, scanning, and rigging. One goal of this workshop is to take all this knowledge and use it to build a fully integrated experience.

Tablet Stories

All projects will be iPad tablet-based, which is the final form chosen for our participation in the exhibition.

Teams

5 x team of 3 students

1 x team of 2 students

Each team should have one person comfortable with speaking in French.

Technology

Complementing your *heart* and *soul*, you will also be using the game engine [Unity](#) — a game engine used to develop the majority of mobile games. This tool will force you to understand framerates, polygon count, and generally keeping things simple with computational resources.

Inside of your Unity-based interactive story, you will leverage the 3D tools you have just learned in the two previous workshops: 3D Modelling, 3D Scanning, Rigging, Motion Capture, Animation, et cætera. Stories will be based in 3D storytelling.

Tutorials

There is a series of tutorials with tips on installing and using Unity: [head-md-care-unity](#)
Please feel free to add new code that might be useful for others.

Audio

We have prepared Zoom audio recorders for you to take with you into the field for your recordings. We have reserved the motion capture suit from the Digital Pool that you can use to directly capture the body movements of your subjects.

Podcast

A series of three podcasts is currently in development by the journalist Karine Pollien for the exhibition: [Les Bureaux](#), [Espace quartier des augustins](#), and [Les maisons collectives](#). Students are welcome to integrate — in whole or in part — these podcasts into their interactive stories.

Talking to Robots

We will be leveraging the insane evolution in the past few months of vibe coding, code completion, and coding chatbots to give you easier access to development with Unity, VS Code, and the C# programming language.

Coach

AI is currently being sold as a replacement for human labor, but one alternative is to invert this relationship and use it as your advisor: for both the technical and production aspects of your project. In this project you will leverage the latest *context engineering* techniques to crash test your ideas and create your production plan. Let the robot help you with the complicated bits.

Documentation

All projects will need to document their process with daily logs, smartphone quickpicks, codebase, story samples, et cætera.

Once all the groups have been formed, we will create a github page following the same logic developed in [similar previous projects](#) that contains :

- `readme.md`
- `presskit`
- `log`
- `codebase`

Projects

Each group must create their current intentions for their project here: [head-md-care-projects](#).

Working Title

Create a working title for each story. This can change.

Student Names

First LAST, First LAST, First LAST

Cardboard Prototype

Make a simple [cardboard prototype](#) of your story world. We will present these to Muriel & Cassandre.

Illustration / Photo

Make a drawing and/or take a picture of your cardboard prototype and add on your project page below.

Intention

Describe your intention in three sentences. Weave into your intention three sentences that include all of the following aspects :

- Context: what is the context you are covering? Focus on what is important, ignore all the little details.
- Persona(s): there is no single way to describe a persona, but you need to situate them inside of their world/context. Think about why we (as readers/players) will care about their story. Ask yourself what do they want, what do they need, what are their struggles?
- Plot: Try to define a central dilemma that does not need to be resolved, but does need to be clearly defined, in the story. This dilemma is what their story is about. This dilemma must imply a central question of care.

Exhibition Document

Here are the slides of the exhibition Cassandre presented to us on April 28, 2026:

Bibliothèques Municipales *une fenêtre sur le monde*

Exposition 2026-2027:

« Bonjour, ça va ? Petites histoires pour créer du lien »

Exhibition from October 3, 2026 to June 26, 2027 at the City Library
Opening reception Friday, October 2 at 6:30 pm

Image tirée du film « **Tender revolution** » d'Annélie Boros, Allemagne, 2024, 95'

1

<https://drive.google.com/file/d/1IPz3H2-YQ3XhuWqzcF00m94gsc0aaz52/view?usp=sharing>

Contexts

The exhibition will be focused on seven groups, developed by the curatorial team into seven different contexts. Each of these groups/communities/contexts will be represented by a specific space within the exhibition. Each Media Design student group will choose one of these contexts and develop a poetic form to tell their story for the exhibition.

1. Maison collective (Collective housing)

- **Youth Department** : contact a [Out-of-home social worker](#) who deals with young people looking for housing
- **Housing cooperatives**: [Codha](#) or [La Ciguë](#), ...

2. Le HLM (habitation à loyer modéré – low income housing)

- **Proche-aidants (= caregivers)**
Véronique Petoud (veronique.petoud@etat.ge.ch), déléguée cantonale aux personnes proches-aidantes

Département de la cohésion sociale (DCS)
Service cantonal des seniors et de la proche aide (SeSPA)
Bureau de la proche aide
Rue Henri-Fazy 2 -1211 Genève 3
Tél. +41 22 546 18 84

- **Concierge**
Odile Magnenat (o.magnenat@lancy.ch), building manager for the [Pont Rouge neighborhood](#), [Maison de l'Adret](#) (in the same neighborhood, where students are expected to provide care services to elderly residents of their building in exchange for reduced rent)

3. Les Sureaux

- **Codha**
Simone Guibentif, Construction Project Manager Assistant (simone.guibentif@codha.ch)
- **Residents of Les Sureaux**
Jean Larvego : j.larvego@bluewin.ch
Léonard Mugny: mugnyl@geplanche.ch
François Nadin : franadin5@gmail.com
- **Architects**
Bureau Liengme-Mechkat (architects of the building) : daniela@liengme-architectes.ch ;

laura@mechkat-architectes.ch

- **EPER**

Irene works at the Foyer Sismondi, which has a vegetable garden at the Jardins des Nations

4. L'Espace quartier (Augustins' neighbourhood)

<https://www.geneve.ch/espace-quartier-plainpalais>

- **Service social**

Izabela Herzog (izabela.herzog@geneve.ch / 076 383 61 23) et Joëlle Pattusch (joelle.pattusch@geneve.ch / 076 382 29 73) community social workers who manage this space and can refer people to the various activities offered by

- [Vendredi j'ai Minoteries](#)
 - The growers at the [Vélodrome](#)
 - [Autour d'une table](#)
 - or other locations and times where CARE is present.
- [ASLPP](#) (the equivalent of ASLOCA for people without papers)
 - Someone from [Silure](#)
 - A resident of the Augustins
 - Thibaut Vibert thibaut.vibert@gmail.com : a co-fondé l'association des Augustins.

5. La rue (The Street)

- [Voirie de la Ville de Genève](#)
- [School Patrol](#) : Children's department
- [Maraude de nuit](#)
- [Night Correspondents](#)

[Elena, Antony, Vincent: notre rendez-vous](#)

6. Le Cimetière des rois

rue des Rois 10, Geneva 1204

- **[Service des Pompes Funèbres :](#)**

Anne HUMBERT DROZ (anne.humbert-droz@geneve.ch), Department Manager

Two undertakers women (croque-morts) : [Sarah Joliat](#) et [Noémie Cossy](#)

Thanatopractors : [Juliette Cazes](#), [Juliette Cuisinier-Raynal](#)

- **Grave Cleaners:**

<https://france3-regions.franceinfo.fr/auvergne-rhone-alpes/allier/vichy/j-ai-change-mon>

[-regard-sur-la-mort-elles-nettoient-les-tombes-le-metier-insolite-d-aurelie-et-charlotte-3240916.html](#)

- **Grave Cleaning Influencers:**

[@ladytaphos](#)

[@cleangirl](#), <https://www.instagram.com/reel/C3bJ3GTR48i/>

- [Green Spaces Department](#) : sector manager Plainpalais ? voir avec Denis

7. La boulangerie / tea-room

- Café le jardin de Sonia
- Le Grand Sac'à Pain» au Grand-Saconnex
- L'épicerie de Troinex
- Boulangerie de Montchoisy (Eaux-Vives)

Bibliography

Many of these books have been collected for you by the HEAD Library. A [web page](#) and QR Code has been created to help you checkout and download books, and which you can also find at the library entrance.

Production Documents

Cassandre & Co. produced a series of documents during their preparations for the exhibition. These documents are provided as-is:

- [Expo care thématiques prioritaires_complet_13.1.26.pdf](#)
- [Expo Care pistes de lecture version7.pdf](#)
- [Remue méninges commun_9.12.25.pptx](#)
- [Présentation BM CITE EXPOS REFLEXION_23.9.25.pptx](#)
- [Tableau-deplacements5.pdf](#)
- [Personnes de références par thématique.docx](#)

During a meeting in February 2026, these scenarios were explored by the curatorial team:

- [Espace collectif et xcommunautaire_scénario_CN.docx](#)
- [Espaces Marchands_scénario_CH_LGC.docx](#)

Appendix

This is intended as a collective live document. If we do this correctly, this document should grow over the next two months. Please add elements here as the project evolves: notes, moodboards, references, technical tips, links to projects, etc.
